Product specification sheet

The indicated data are typical or average values, but are not assured attributes. This product is not subject to the Construction Products Regulation.

Installation/Laying

1. Ensure the surfaces to which the profile is to be fixed are clean, dry and flat.
2. Trim the profile to the required size.
3. Apply a complementary and suitable cartridge adhesive on the wall and place the profile on it.

For further information for the installation use our video which you find on our website www.kueberit.com under downloads and you find additional information in our catalogue "Küberit-Best".
