3. After washing the product, make sure that it is completely dry before laying it back under the rug.
4. Moist carpet stop and floor may stick together when drying.

QUESTIONS & ANSWERS

1. **Question:** Does the carpet stop have to be exactly in the same size as the rug?
Answer: Carpet stop prevents the rugs from shifting, slipping and forming waves even if does not cover the whole area under the rug. Carpet stop should be slightly smaller in size than the rug itself so that it would not stick out from under the rug. As an alternative, several smaller pieces of carpet stop can be used.
2. **Question:** I have installed carpet stop under my rug, but the rug is still shifting when pulled by hand.
Answer: Carpet stop will become functional only after stepping on the rug. The efficiency of the product may vary by the flooring and rug types.
